

FAASTeam presents:

# **Co-Pilot Workshop: Radio Communication and Air Traffic Control**

Are you married to a pilot? Or connected in any other way? If you frequently find yourself in the cockpit with a co-pilot maybe things would be more enjoyable if they knew a little about what they were doing this session is for you.

What is that secret language that pilots speak on the radio? To whom are they communicating?

What the heck are they trying to say?

San Carlos Flight Center regularly holds Partner-to-a-Pilot Workshops that are intended to demystify flight for people that fly often as passengers with other pilots. The more you can understand about what is going on in the cockpit, the more enjoyable the flight will be, and the greater your ability to impact the safety of the flight.

Join SCFC CFI and Chief Pilot Dan Dyer for an introduction to radio communication and air traffic control from the perspective of non-pilots. We will start with a training session on radio phraseology, and an introduction to the various people that talk back to us on the radio. We continue our talk with a review of the various uses of the radio and radio clearances. Finally, we will discuss the radio transponder and squawk codes. Included are a few exercises designed to help you become more familiar with radio procedures and terms. This will be a fun, interactive introduction to radio

## Event Details

**Sat, Jan 9, 2016 - 12:00 PST**

**San Carlos Flight Center**

655 Skyway Road

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center**  
**(650) 946-1700**

Representative Jonathan Slocum

communication in flying.

The Partner-to-a-Pilot Workshop is open to anyone, including very new beginner pilots, but special emphasis will be given to the perspective of a Right Seater, someone who typically rides along in an airplane flown by another pilot. No prior training required. Newbies welcome.

SCFC's Partner-to-a-Pilot Workshop Series can help improve pilot/passenger relations. If you have a friend, relative, or spouse who flies with you, this seminar series is designed to give them opportunities to learn a little bit more about what is happening in the cockpit. Each session will familiarize participants with one area of flying so that they can be more knowledgeable about what is happening during the flight. Our seminar series covers ground training but can be paired with in-flight training sessions on request.

To enroll, call San Carlos Flight Center at (650) 946-1700 or [click here to sign up](#). SCFC pilots sponsoring right-seat participants should check with Dan Dyer at SCFC to see how they can participate.

**Directions:** Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
